Top Skills

Research and Development (R&D)
Databricks Products
Snowflake Cloud

Languages

English (Native or Bilingual)
Arabic (Elementary)
Persian (Native or Bilingual)

Certifications

Professional Cloud Architect
Certification
Linux Administration Bootcamp:
From beginner to Advance
Continuous Delivery with GitLab
Completion of Electronics
Workshops
Python Workshop Series

Honors-Awards

Dean's List of 2016-2017
Dean's List of 2017-2018
First Place, Ryerson Engineering
Competition, Junior Design
Dean's List of 2020-2021
Dean's List of 2018-2019

Erfan Kashani

Sr. Data Engineer, Cloud Architect @ Canadian Tire Corp. | Scaling
Data Products & Platforms
Whitby, Ontario, Canada

Summary

I'm a Senior Data Engineer with a passion for turning data into actionable insights and driving innovation through technology. With a strong background in data engineering, cloud architecture, and project management, I've had the privilege of leading and contributing to transformative projects.

At Canadian Tire Corp, I spearheaded the development of a distributed data products that impacted the purchasing habits of millions of customers. I thrive on cross-functional collaboration and recently developed real-time offer targeting engine which personalizes and enhances customer's shopping journey. I'm also a strong advocate for continuous learning and have been actively promoting knowledge sharing through mentoring and tech-talk series.

Let's connect and explore how we can collaborate to drive creativity and innovation in the software engineering space.

Experience

Canadian Tire Corporation
5 years

Senior Data Engineer - Customer Insight and Analytics
August 2022 - Present (3 years 10 months)
Toronto, Ontario, Canada

- building robust, scalable data pipelines using Spark or Spark-SQL with Airflow scheduler/executor framework
- Automating the data pipeline's quality checks, governance, and anomaly detection to increase the accuracy.
- building real-time API & data pipelines using a serverless architecture
- teaching and upholding modern software development practices (Agile, TDD, CICD)

Data Engineer - Customer Insight and Analytics

February 2022 - August 2022 (7 months)

Toronto, Ontario, Canada

- Created hybrid-cloud batch-processing data pipeline architecture leveraging Databricks, DBX, Workflows, and Airflow, resulting in 30% improved efficiency and reliability of the self-served enterprise cloud architecture.
- Implemented Continuous integration and delivery procedures, abstracting complexity from the developer, leading to a 15x reduction in test iteration time.

Data Scientist, Data Engineer - Demand and Inventory Forecasting

June 2021 - January 2022 (8 months)

Toronto, Ontario, Canada

- Large dataset analysis, investigations, and reporting on legacy databases, on premises warehouses, and the cloud infrastructure.
- Creating ETL pipelines for new data sources into Hadoop and Snowflake environment.
- Contributing in model migration to the cloud using distributive analytic engines such as Apache Spark.
- Data deduplication, anomaly detection, and feature engineering on time series data.
- working with tools and languages such as: Hive, Oozie, Beeline, AML resources, Databricks, Pyspark.

Bell

Software Automation Engineer

August 2019 - August 2020 (1 year 1 month)

Toronto, Canada Area

Web Application Development (full-stack web development)

Tools: Ruby on Rails,

- Using agile methodologies to plan and execute feature development projects
- Full stack development for multiple web applications
- Upgrading application security
- Revamping a front-end design for an inventory management web application

DevOps:

Tools: Docker, Kubernetes, Private Gitlab Server, Private Docker Registry Server

- Building and maintaining CI/CD pipelines.
- Maintaining internal GitLab repositories.
- Working with docker-files and docker-compose files
- Familiarizing with container orchestration tools such as Kubernetes

Automation Development (software development)

Tools: Ruby, Appium, Selenium.

- Building scripts in ruby to automate phone testing process.
- UI mapping of different phone front-ends using appium and selenium
- Developing features for a multi-service application.
- Project management using agile methodologies (planning, executing).

Y Combinator

YCombinator Graduate

July 2019 - September 2019 (3 months)

Toronto, Canada Area

Covered topics such as:

- How to Evaluate Startup Ideas
- How to Perform User Interviews
- How to Set KPIs and Goals
- How to Plan Your MVP
- How Investors Evaluate Consumer / B2B Startups
- How to Avoid Startup Finance Pitfalls
- Improving Co founder Communication
- How to Create a Healthy Culture
- How to Improve Conversion Rates
- Introduction to Modern Startup Financing
- How to Talk to Investors about your Startup
- How to Become a \$100B Company

The DMZ

DMZ Fellow

June 2019 - July 2019 (2 months)

Toronto, Canada Area

The DMZ Sandbox is a world-leading incubator program that helps emerging entrepreneurs refine their business idea and develop the skills necessary to build a competitive tech business. As a DMZ Fellow, entrepreneurs are given the opportunity to learn about the introductory skills required to build a successful startup. Program topics include:

- customer/market validation
- prototyping and product management
- sales and business development

Ryerson University

Electronic Control Systems Specialist

May 2018 - August 2018 (4 months)

Toronto, Canada Area

Fabrication Lab, Architectural Science Department, Ryerson

Levi's® Stadium

Supervisor

February 2016 - August 2016 (7 months)

Vaghammills mall

- Greeted customers at the door and assisted them with their choices as a specialist
- Identified customer needs and upsold to higher value products as often as possible
- Always met the established sales goals and frequently was chosen as employee of the month

Parya Trillium Foundation

Leadership Course

May 2014 - January 2015 (9 months)

Participants develop leadership skills and build confidence and self-esteem to help facilitate the integration of Newcomers into Canadian society

Learn how to relate to people of all different ethnic backgrounds

Develop project management and organizational skills

Education

Ryerson University

Bachelor of Computer Engineering, Specialized In Management

Science, Computer Engineering · (2016 - June 2021)
